EDUCATION

University of Cebu – Main

Bachelor of Science in Computer Science (BSCS)

June 2025

Sanciangko St, Cebu City, 6000 Cebu

- **Honors:** Cum Laude

WORK EXPERIENCE

Knowles Training Institute

Aug 2024 – Dec 2024

IT Intern

Remote

- Developed and customised web pages using WordPress based on the company's established templates, ensuring consistency and functionality across multiple sites.
- Created engaging course content with the aid of AI-powered tools, adapting prompts provided by the company into clear, informative, and well-structured website material.

SOFTWARE PROJECTS

Portfolio Website (*PHP, HTML, CSS, JS, PostgreSQL*)

<https://salabsab-portfolio.up.railway.app>

- Designed and developed a personal portfolio website from scratch, showcasing projects and skills.
- Implemented full CRUD functionality with PostgreSQL as the database.
- Deployed and maintained the application on Railway Hosting.

COLAF: Hotel Management System (*C# ASP.NET, HTML, JS, Tailwind, PostgreSQL*)

<https://github.com/KrammyBoy/COLAF-Hotel>

- Built a hotel reservation and management system as part of a .NET course project.
- Developed backend logic, integrated PostgreSQL for database management, and designed the frontend using Tailwind CSS.
- Implemented features including user and employee management to support core hotel operations.

LegiDoc: Handwriting Conversion (*React Native, Typescript, Expo, Python, Flask, MySQL*)

<https://github.com/KrammyBoy/LegiDoc>

- Created a mobile application to recognize handwritten medical prescriptions using machine learning.
- Developed a Bi-LSTM neural network model to recognize handwritten medical prescriptions with an accuracy of 50%.
- Built the mobile frontend in React Native and integrated it with a Flask API backend and MySQL database.

Faculytics: Faculty Evaluation System (*PostgreSQL, Tailwind, Flask, Python*)

- Collaborated in a team of five(thesis) to design a system for analyzing qualitative faculty feedback.
- Fine-tuned a DistilBERT model for sentiment analysis.
- Assisted in frontend development with Tailwind CSS and backend implementation in Flask.
- Delivered data visualisations, actionable suggestions, and reporting features for decision support.

CERTIFICATIONS, SKILLS & INTERESTS
